

NEHA SOHAIL

PRODUCT DESIGNER

📍 Washington, DC P: 571-225-3919 E: nsohail92@gmail.com
🔗 nehahiatt.github.io/portfolio

Product designer at Meta building the promotion platform behind every campaign that reaches billions across Facebook, Instagram, WhatsApp, and Messenger.

A systems thinker who thrives where the problem is messy and the path forward isn't obvious — zooming out to see how things connect, then zooming in to get the details right. Leads teams, drives strategy, and mentors designers along the way.

EDUCATION

2011 to 2015

B.A. IN ART AND VISUAL TECHNOLOGY

George Mason University

- Custom AI agents & automated design workflows

COLLABORATION & PRODUCTIVITY

- Microsoft Office
- Google Workspace

EXPERIENCE

2022 to present

PRODUCT DESIGNER | META

Lead designer for Meta's campaign creation and launch platform — an internal tool product teams use to build and ship promotions to billions of people across Facebook, Instagram, WhatsApp, and Messenger.

- Reimagined the end-to-end campaign creation workflow and launched an AI-powered experience that reduced campaign setup time from hours to minutes.
- Partnered closely with design systems, engineering, and product teams to standardize campaign templates across Meta's family of apps, creating a more consistent user experience at scale.
- Owned product design, while driving content design and UX research across the full campaign creation and launch experience.

2017 to 2022

DESIGN MANAGER | CAPITAL ONE

Grew from Senior Associate to Design Manager over 5 years, leading design for customer-facing banking experiences across enterprise.

- Led end-to-end experience for Eno, Capital One's AI assistant, driving a 50%+ lift in feature adoption and \$1M+ in operational savings.
- Created Capital One's first enterprise design system, defining reusable components, interaction patterns, and usage guidance across native and web platforms.
- Led cross-functional design sprints and future-state concept explorations to shape the evolution of Capital One's customer servicing platform.
- Managed and mentored a team of two designers on the Enterprise design team.

2013 to 2017

UI DEVELOPER | THROUGHLINE, INC

Bridged design and engineering by designing and building AngularJS applications for enterprise and government clients including PepsiCo, U.S. Navy, and USPS.

- Collaborated directly with engineering, creative directors and CEO to rapidly prototype and deliver client solutions across a wide range of industries.

2012

GRAPHIC INTERN | THE WASHINGTON FAMILY MAGAZINE

Designed print layouts independently and supported the team through fast-paced production cycles.

- Created the December issue's table of contents, article pages, and ad layouts.
